

Sensor Input Module (SIM)

*Integrate non Bluetooth® Sensors
with the Avi-on Network*

Status LEDs & Config Button
Quick and easy validation of wiring
and network

Direct Connect™ Compatible
Use as a communications module for
Direct Connect Sensors not wired to a
fixture

Contact Closure Input
Detects external 12-24V Contact
Closure to trigger a range of actions
in the Avi-on Network

External Antenna

Flexible antenna options if
mounted in metal enclosures

PRODUCT OVERVIEW

Avi-on's Sensor Input Module or SIM, is a multipurpose Avi-on network node that can integrate third party analog sensors as well as Avi-on Direct Connect Sensors into the Avi-on network without being tied to a fixture controller.

The SIM gives third party analog sensors, as well as inputs from building control, fire, security, and other systems a simple and low cost method of triggering lighting actions in an Avi-on network. The SIM is triggered by a contact closure (open or closed momentary). The resulting behavior is programmed in the Avi-on network and is similar to the features available to Direct Connect motion sensors.

The SIM is also Direct Connect compatible, and is an ideal choice to use with Avi-on PIR or Microwave Direct Connect sensors for applications that are remote from a lighting fixture or power pack like stand alone motion or daylight sensor placements.

Features

- Simple low, cost integration of third party sensors on the Avi-on network
- Direct Connect sensor compatible
- 12-24VDC power and contact closure inputs
- Small and compact size accommodates integration into multiple installation configurations
- Optional antenna configurations available for mounting in metal enclosures

ORDERING INFORMATION

Part Number	Description	Antenna	Input Voltage
AVI-B-SIM-12-24VDC-EA	Sensor Input Module, single channel	UFL-Wire	12 - 24VDC

To order please contact Avi-on sales at (877) AVION-US, (877) 284-6687 or prosales@avi-on.com for order information or integration support.

Project		Location/ Type	
---------	--	-------------------	--

SPECIFICATIONS

Input Voltage:	12-24VDC	Wireless Standard:	BLE 4.2 with Mesh
Power Consumption:	17mA	Point to Point Range¹:	80ft with obstructions and 350ft unobstructed
CC Input:	12-24VDC Non powered contact closure detection (momentary)	Security:	AES 128-bit encryption for device to device communication AES 256-bit encryption for device to cloud communication
Direct Connect Input:	Compatible with all Avi-on Direct Connect™ Motion/Daylight sensors	Warranty:	5 years; 10 years optional
Size:	2.30in x 1.43in x 0.75in (58.2mm x 36.4mm x 19mm)	Regulatory:	FCC ID: 2AFZI-AVIBG21 IC ID: 20544-AVIBG21 BQB: DID: D063032 CE: EN IEC 6100-6-1:2019, EN IEC 6100-6-3:2021 UL 916, 2043 (Plenum Rated) UL 924 Emergency Lighting Equipment
Mounting:	Removable mounting tabs		
Weight:	0.45 oz (16g)		
Terminal Blocks:	22-16 AWG wires		
Operating Temperature:	-40F to +158F (-40C to +70C)*		
Storage Temperature:	-40F to +185F (-40C to +85C)		
Humidity Rating:	95% non-condensing		
Radio Frequency:	2.4GHz		

Note: Operating controller at or above these levels may result in damage to components/product

*For temperatures below freezing or dew point, the device should be sealed in a watertight container to prevent frost buildup

**When communicating through the mesh, range is essentially unlimited (5000ft+)
